VARIANCE OF STANDARD REQUEST

This variance of standard request is to allow a subdivision identification sign that is not located at a subdivision entrance (*WC 16.08.010, F1*). Specifically, this request is to allow a permanent Merrimac subdivision sign at the northwest corner of 146th Street and Spring Mill Road.

PROPERTY INFORMATION

The subject property is Common Area – Block A of the Merrimac subdivision, Section One. The subject property is located at the northwest corner of 146th Street and Spring Mill Road. The common area contains a retention pond and is zoned SF-2.

The subject property is bounded on the north and west by SF-2 residential lots in the Merrimac subdivision. The Village on Spring Mill Apartments is located across Spring Mill Road to the east and is zoned GO-PD. Adjacent property to the south (across 146th Street) is within the City of Carmel's planning and zoning jurisdiction; it is single-family residential in nature and contains single-family residences and a neighborhood amenity area.

The subject property does not fall within any of the Town's overlay districts.

PROPERTY HISTORY

On June 14, 1993, the Westfield Town Council changed the zoning on the subject property from AG-SF1 to SF-2 (93-Z-10; Ord 93-10). On October 25, 1993, the Westfield-Washington Township Plan Commission approved the primary plat for the Merrimac subdivision (then named "Merrimac Farms") (93-P-28). On January 24, 1994, the Plan Commission approved the final plat for Section One of Merrimac (93-P-28), which includes the subject property, Common Area – Block A. From that point forward, the additional five sections of Merrimac received final plat approval from the Plan Commission.

There are no additional variances, special exceptions, development plans, subdivision plats, or rezoning cases on record for the subject property.

ANALYSIS

The submitted application indicates that a new, permanent subdivision identification sign would replace an existing marketing sign at the northwest corner of 146th Street and Spring Mill Road. The proposed subdivision identification sign is similar in character and materials as the existing signage at the subdivision's three entrances. Placing a permanent subdivision identification sign at an intersection that does not function as an entrance to the subdivision is not entirely unique, but is rare in Westfield-Washington Township.

Since there are still lots for sale in the Merrimac subdivision, the existing marketing sign is permitted and would not have to be removed until the structure on the final lot is completed. Signs advertising construction projects are permitted by-right according to the Sign Standards.

The existing sign is approximately eight feet (8') in width and eight feet, one inch (8'1") in height – approximately 64 square feet in total. The proposed sign would be set into a brick wall that is approximately sixteen feet (16') in width and five feet, nine inches (5'9") in height (including columns) – approximately 90 square feet for the wall structure. The proposed sign itself would be approximately seven feet (7') in width and three feet (3') in height – approximately 21 square feet. The proposed signage would be required to comply with all remaining standards for subdivision signage not varied by this request and would require a sign permit.

The Westfield-Washington Township Comprehensive Plan recommends that this area remain residential in character and use. It is identified as part of the "Suburban Residential" component of the future land use plan.

FINDINGS

No variance of standard shall be granted unless the BZA finds all of the following to be true:

- a. That the approval of such variance of development standard will not be injurious to the public health, safety, morals, and general welfare of the community:**

Findings: It is unlikely that the approval of the requested variance of standard would be injurious to the public health, safety, morals, and general welfare of the community. The intent of limiting subdivision signage to entrances is to enhance way-finding in the community and to control the amount of signage erected in the community. By allowing the requested sign, way-finding may be improved because the addition of the sign at the requested location would give more people attempting to travel to the subdivision another opportunity to successfully identify the subdivision. However, allowing the requested sign would conflict with the community's desire to restrict and limit the amount of signage a subdivision could install. So, while it is unlikely that approval of the requested variance would be injurious to the public health and safety of the community, it could conflict with the community's preferences, as established by the zoning ordinance.

b. That the use and value of the area adjacent to the property included in the variance of development standard will not be affected in a substantially adverse manner:

Findings: Allowing an additional permanent subdivision identification sign for the Merrimac subdivision is not likely to affect the use and value of adjacent properties in a substantially adverse manner. The surrounding area is residential in nature, and it is commonly understood that residential subdivisions in Westfield-Washington Township erect identification signage. Additionally, the proposed sign would replace an existing sign that has been in place for several years. The impact of the proposed change would be negligible for surrounding properties.

c. That the strict application of the terms of the zoning ordinance will result in practical difficulties in the use of the subject property:

Findings: The use of the subject property as a common area and storm water retention area would not be altered if the variance request were either approved or denied. Strict application of the zoning ordinance would allow for the Merrimac subdivision to only have subdivision identification signage at its entrances. Use of the subject property does not hinge on the approval of this variance request.

NOTE: If the Board does not determine ALL findings of fact in favor of the appellant, then it may not legally approve the variance request.

RECOMMENDED CONDITIONS

If the Board approves this variance of standard request, the following condition would be appropriate:

1. That the subdivision identification sign be constructed to the specifications and dimensions outlined in the attached plans.

My commission expires: April 14, 2008

Application for VARIANCE OF DEVELOPMENT STANDARD

EXHIBIT A

- A) Public health, public safety, public morality and the general welfare of the community have not been compromised as a result of the current sign, which has been in place for approximately 10 years.

The approval of the requested variance will allow the Merrimac Homeowner's Association to erect a replacement sign built in to a masonry wall which will be more aesthetically appealing and harmonious with the environment as it will match the existing signs at all entrances of the neighborhood. It will also compliment the adjacent sign on the NE corner of 146th & Springmill Roads which was recently changed as a result of the acquisition of The Village on Springmill apartment complex.

The overall height of the new sign will be significantly lower to the ground than the current sign which has a maximum height of approximately 8 feet.

Public safety will be improved as the opening to the retention pond NW of the current sign will also be nearly eliminated as the span of the proposed masonry wall will be 16 feet in total length, resulting in a minimal opening on each side of the masonry wall of less than 1'. This is compared to the current opening of nearly 5 feet on each side of the current sign.

Further, the proposed sign will serve as a welcome monument to the City of Westfield, as the new sign will have "of Westfield" below the word "Merrimac" as required by current zoning regulations.

- B) The use and value of the areas adjacent to the property will be enhanced by the replacement of the current sign as the proposed sign will be of an ever-lasting design which will need no modification or maintenance in the future. The current sign requires maintenance from time to time as well as it is advertising home sites which are no longer available and a phone number which is no longer in service.
- C) The current sign which the Merrimac Homeowner's Association would like to replace was approved under the old guidelines and regulations of the Town of Westfield. At the conclusion of marketing the community, the intent was to replace the sign which is currently in place with a sign identical to what is currently proposed at this time.

As the Town of Westfield, and this board may be aware, the Developer ran in to some financial difficulties and did not complete certain aspects of the community as presented to homeowners and possibly the town-- including the proposed sign.

Since a somewhat "hostile takeover" of the Association from the Developer in 2004, myself and the other members of the Board of Directors of the Merrimac Homeowner's Association has been working diligently to resuscitate the Association financially and to identify, correct and cure items which were deemed incomplete or insufficiently provided by the Developer. Other recently completed items were community sidewalks and community street lighting.

The strict application of the terms of the current ordinance would be impractical as the result would be a sign at the intersection of 146th & Springmill Roads for years to come which:

- (i) Requires routine maintenance
- (ii) Advertises home sites which are not available for purchase
- (iii) Advertises a phone number which is not in service.

The granting of this variance would clearly allow us to solve this issue with a more aesthetically appealing and harmonious sign which will be beautifully landscaped and will serve as a terrific welcome and gateway to the City of Westfield.

June 11th, 2007

Town of Westfield
Community Development Department
Board of Zoning Appeals
130 Penn Street
Westfield, IN 46074

The Board of Directors of the Merrimac Homeowner's Association has approved the replacement of the original sign installed by the developer at the intersection of 146th & Spring Mill Road with a masonry sign nearly identical to those at the entrances of Merrimac.

The purpose of changing this sign is to finally install the type of sign that the developer indicated he intended to install at the completion of development.

The current sign requires routine maintenance and advertises both home sites which are not available for purchase as well as a phone number which is not in service.

Replacement of the current sign will surely enhance the intersection of 146th & Springmill Roads while having no negative impact on the area, as a sign is currently in place.

The Board of Directors respectfully requests that the Board of Zoning Appeals issue a variance to WC 16.08.010 which will allow the Merrimac Homeowner's Association to physically enhance the intersection of 146th & Springmill Roads which serves as a gateway to the soon to be City of Westfield by replacing the original sign with a masonry sign which will match the signs at the 3 entrances to Merrimac.

The proposed sign will be inlayed in a 16" deep masonry wall which is 12' feet in length in between 2 (two) 2' x 2' masonry end posts.

Maximum height of the masonry wall will be 5'6",

Maximum height at the top of the 2'x2' end posts will be 5'9".

The actual Merrimac sign will be 7' by 3'

Please see the attached photo of the sign we wish to replicate.

NOTE that "of Westfield" will be engraved below "Merrimac" on the new sign as required.

There are no plans to change the two light poles which currently exist which will illuminate the signage.
The hours the lights are illuminated are sunset to sunrise as the poles are on dawn to dusk sensors.
Naturally, the landscaping around the sign will remain.

The Merrimac Homeowner's Association appreciates your attention to this application and your support of the permissions requested.

Respectfully,

Matt Lutz
President
Merrimac HOA
